

SHAWN KEYES, MBA, P.Eng., M.Eng.

Burnaby, BC • 604-834-8761 • shawn@shawnkeyes.com • linkedin.com/in/shawn-keyes

SUMMARY

Strategy and growth executive driving innovation in construction with deep expertise in mass timber, prefabrication, and industrialized housing. MBA and structural engineer with experience leading flagship projects, organizational transformations, building markets, and growing a productized manufacturer to commercial scale via a \$80M+ pipeline. Practical strategy and hands-on execution from someone who has done it before, with a rare combination of business acumen and technical depth.

AREAS OF EXPERTISE

Strategic Growth & Business Planning	Mass Timber & Prefabricated Construction	Executive Leadership & Team Building
Go-to-Market Strategy	Building Systems & Manufacturing	Technical Sales & Business Development
Market Development & Partnerships	Structural Design	Stakeholder, Investor & Government Relations

PROFESSIONAL EXPERIENCE

INTELLIGENT CITY | Delta, BC

2025-2026

Venture-backed manufacturer of an industrialized, prefabricated mass-timber housing platform. Raised \$50M+.

VICE PRESIDENT, STRATEGIC GROWTH

Executive responsible for the full commercial function, partnering with the President on corporate strategy. Oversaw sales, marketing, pricing/estimating, partnerships, and project management. Stabilized the commercial engine, repositioned the offer, and built the pipeline during a capital constrained period.

- Repositioned IC from a vertically integrated design-builder to a building systems manufacturer, eliminating critical sales channel conflict and sharpening market positioning.
- Established Design-Assist delivery model and secured \$80M+ of projected revenue in design contracts by anchoring the value proposition in cost, schedule, and constructability data from market sounding and direct delivery work on Halsa, Ontario's tallest mass timber residential building.
- Built the commercial engine from scratch: ideal client/partner profiles, target market segments, pricing & partnership strategy, CRM implementation, and qualification process.
- Led Ontario market development, enabling 10X growth from a 100-unit-per-year demonstration facility into a 1,000-unit-per-year commercial scale.
- Established a Preferred Supply Agreement with Windmill Developments for 300+ units per year, anchoring commercial expansion.
- Reduced COGS by 15% through material substitutions and made-in-Canada supply chain partnerships, improving project economics and bid competitiveness.
- Led federal and provincial government relations, including direct engagement with Build Canada Homes, BC Housing, and Natural Resources Canada.

WOODWORKS BC (Canadian Wood Council) | Vancouver, BC

2022-2025

Market development program for wood construction in British Columbia.

EXECUTIVE DIRECTOR

Recruited to revitalize a stagnant program, strengthen stakeholder relations, and grow market impact. Full oversight of a \$1.5M annual program and a team of four staff. Rebuilt the team, governance, and funding base while driving market and policy impact.

- Designed and executed a three-year strategic plan that established WoodWorks BC as the province's trusted resource for timber construction. Established cross-region Technical Responsibility Groups for national alignment.
- Founded the WoodWorks BC Network, including 50+ companies across the AEC+D value chain, increasing industry collaboration and diversifying the funding base.
- Recruited a multidisciplinary team with 40+ years of combined experience and 50+ completed mass timber projects. Exceeded 2023 KPIs by 2.4x and advised on 150+ mass timber projects across BC.
- Established the BC Governance Committee, a group of senior industry leaders providing strategic oversight and accountability.
- Built industry presence through 50+ executive presentations to AEC+D leaders, housing providers, government, and conferences/media.
- Established strategic partnerships with ULI, UDI, BUILDDEX, Zonda Urban, BTY, and Construct Connect to increase visibility and market intelligence.

FAST + EPP | Vancouver, BC / Edmonton, AB

2016 - 2022

Award-winning structural engineers; international leaders in mass timber design.

SR PROJECT MANAGER & OPERATIONS LEAD

Structural engineer and project delivery leader specializing in mass timber and hybrid structures. Carried \$2.5M+ in billable projects annually while managing an internal team of 8 and coordinating workload across 100+ professionals in five offices.

- Led the delivery of complex institutional, civic, commercial, and residential projects across British Columbia, Alberta, and Ontario, including projects as Structural Engineer of Record.
- Developed firm-wide QA/QC protocols and project management systems to strengthen technical review processes, reduce risk, and improve forecasting and planning.
- Contributed to business development and operational leadership initiatives supporting firm expansion from 50 to 150 staff, including early market development efforts in AB and ON.

BOARD & ADVISORY EXPERIENCE

Association of Neighbourhood Houses of BC Board Director	2026-Present
BC Office of Mass Timber Implementation Advisory Council Member	2022-2025
BCIT Mass Timber Education Advisory Board Member	2023-2025
BC Housing (DASH Program) Leadership Council Member	2024-2025
Forestry Innovation Investment Market Acceptance Advisory Committee Member	2022-2025

EDUCATION

Master of Business Administration UBC Sauder School of Business Vancouver, BC	2024
Master of Engineering Carleton University Ottawa, ON	2016
Bachelor of Engineering Science University of Western Ontario London, ON	2013
